

## IcePower HOT warm gel

- The application of IcePower HOT Gel helps to improve circulation and make muscles warm and relaxed.
  - The effect is based on ingredients such as Camphor and Capsaicin. Stimulated capillar circulation brings more oxygen to tissues and cells, thus contributing to the healing process.
  - The gel has been designed to provide help in disorders of peripheral circulation, various types of aches and non-inflammatory pains and tensions.
  - IcePower HOT Gel is an excellent preparation for athletes and exercisers to prevent strains and ruptures.
  - Effect begins not until one hour after application. Sweating, sauna or warm clothing increases manifold the warm effect on the skin.
  - Do not use if you are allergic to Capsaicin (chili). Never use warm therapies when having inflammation.
  - IcePower Hot gel is not recommended used during pregnancy
- Packaging sizes 75 ml and 75 ml ROLL

The effect of IcePower Hot warm gel begins not until one hour after application. Sweating, sauna or warm clothing increases manifold the warm effect on the skin. Remember to wash you hands immediately after applying HOT gel.
